

ADVANTAGES

- Hardware availability for Real-time Temperature Measuring & Recording System
- CPU/OS : Intel core i3 4GB/500GB SSD / Windows 10 IOT.
- High Resolution Camera for facial Detection (300 - 500 mm sensing distance)
- 10.4" LED Monitor
- Supports Badge/ID Card Scanning.

Specification for Real-time Temperature Measuring & Recording System

- Adjustable height from 1500mm to 1700mm.
- Hand Sanitiser Platform (Auto/Manual)
- Face mask detection.
- High Temperature setting, Capture face Photo, Sound Playback.
- Immediate email notification when high temperature detected.
- Daily log file email attachment.
- Digital I/O to integration to door access, turnstile, flap gate, alarm / siren.
- Integration to customer time attendance system.

ADVANTAGES

- Nowadays due to the COVID-19 Pandemic we all know that frequent hand washing is important to prevent the spread of infectious agents to and from those with whom we have both direct and indirect contact.
- Frequent hand washing with soap damages the skin which can change the skin flora, resulting in more frequent colonization of bacteria.
- Alcohol-based sanitizers may be less irritating to skin, their use may actually improve hand hygiene.
- The alcohol sanitizers work immediately and effectively in order to kill bacteria and most viruses.
- Organizations that encourage regular use of hand sanitizer tend to have healthier workers. A study found that office workers who were encouraged to use an alcohol-based hand sanitizer at least five times each workday were about two-thirds less likely to get sick.
- A 2015 survey says only 33 percent admitted to skipping soap and rinsing with water. This makes it extra important to provide Alcohol based hand sanitizer in the restroom which ensures germs don't escape the restroom and enter their workspace

SPECIFICATIONS

- 5 litre Capacity.
- Sensor Base Automatic dispense.(NO TOUCH)
- Dispenses 2ml, spray of Alcohol Sanitizer.
- Easy to install, user friendly machine.
- Low power consumption

Smart Thermal Detector (Screening System)

- XIPHIAS Smart Thermal Detector make use of thermal, infrared, environment temperature and AI features concept.
- Body temperature measurement done in 2 seconds. This System is benefit for quick scanning, no human error and high privacy.
- Trigger the system alert automatically if the body temperature is exceed the threshold.
- Connection with internet and CMS system with encryption makes easy for recording, tracking, doing analyses and statistic.

SPECIFICATIONS

CPU/OS	Intel Quad-cores: Z8300 2GB_Flash 32GB		
Screen Size	10.2" IPS Display		
Measure	Thermal, Optical, Infrared		
Connectivity	NFC, WIFI, LAN X 1, USB X 2		
Power	DC12V /1A	Operation Temperature	10 to 40 °C
Dimensions	L38 X W 24 cm	Storage Temperature	0 to 50 °C
Weight	1.5 kg	Accuracy	±0.3 °C
VESA Mounting	100-150cm (H)	Measuring Distance	10 - 30cm
NFC RFID Frequency	13.56 MHz mifare 1 s50, s70/ mifare Ultra-Light, / mifare Pro, mifare desfire

REAL-TIME TEMPERATURE MEASURING & RECORDING SYSTEM

SPECIFICATIONS

- Face Mask Detection
- High Temperature Setting
- Ambient Temperature Compensation
- Capture Face Photo
- Sound Playback
- Immediate Email Notification when high temperature detected
- Daily log file email attachment
- Door access, turnstile, Flap gate
- Alarm/ Siren
- Integration to customer time attendance system

ADVANTAGES

- Sanitizing Tunnel will be provided for spraying approved sanitizer over the person which will be sensor based to avoid unnecessary disinfectant spray.
- Provision of sensor to detect person entering the tunnel
- Disinfectant spraying system from top as well as from sides to
- completely sanitize the person going through the tunnel
- Storage tank for Storing of Disinfectants in Disinfectant tunnel
- Provision of Sanitizer at the entrance of every tunnel.
- Easy transportable.
- Safe for Human health.
